1. Summary of our assessment

The Society has assessed that:

- The products meet the needs, characteristics & objectives of the identified target market.
- The products provide fair value to consumers in the target market (i.e. the amount paid for it is reasonable relative to the benefits of the product).
- The intended distribution strategy is appropriate.
- The above will continue to be the case for a reasonably foreseeable period.

2. Product characteristics & benefits

The products are designed to meet the needs of the target group, most notably the need to secure finance on a property intended to be let out to tenants on an AST (in England) or a Standard Contract (in Wales). The product features and criteria are designed to support these needs. We have also identified where characteristics and benefits may have potential downsides for some consumers.

- Choice of Repayment or Interest Only, giving BTL borrower choice and potentially lower Contractual Monthly Instalments (but will not own property at end of term if on Interest Only)

4. Customers with characteristics of vulnerability

The Product has been designed for a wide target market, which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

We considered the needs, characteristics, and objectives of customers with characteristics of vulnerability at all stages of the design process for this Product, and the Society has in place a framework to support vulnerable customers at all stages of the mortgage, including:

- Education, training and support for our staff to ensure they have the appropriate skills and experience to recognise and respond to the needs of vulnerable customers.
- Suitable customer service provision and communication options in a variety of channels.
- Flexible policies, where appropriate, to support vulnerable members.
- Monitoring to ensure we continue to meet and respond to the needs of customers with characteristics of vulnerability.

Distributors should inform us if they have identified the client has characteristics of vulnerability so we can make appropriate adjustments.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.

Distributors should take account of individual customer needs and circumstances, as well as the needs of FTBs needing a high LTV mortgage.

Intermediaries should continue to comply with their obligations to ensure that they treat customers in vulnerable circumstances fairly.

5. Review of closed book Buy- to-Let products

We have completed a full review of all our closed Buy-to-Let products and can confirm that we have concluded that these products provide fair value to our members. The review addresses the benefits, price, cost, and limitations, using similar methodology to the reviews done for open book products.

The nonavoidable fees within this product group are not excessive and within a range comparable with wider market. Previously we charged £33 per month for arrears management fee and £12 for every unpaid Direct Debit payment, but these were removed in early 2020.

The reviews highlight potential improvements in the way we calculate Early Repayment Charges (i.e. better reflect the length of the remaining product term rather than a flat fee). This is also being considered for open book products as part of our product improvement roadmap.

6. Our assessment of value

We have developed a comprehensive and robust assessment process which evaluates several aspects of our business to determine the value of our mortgage product. This analysis is used to ascertain whether the Product delivers fair value for customers.

The outcomes of the assessment process are presented to the Executive and Board, allowing for challenge and further investigation before we sign-off the outcomes and share the summary of our assessment with you.

Our fair value assessment has considered the following:

Benefits	Price	Costs	Limitations
The range of features that the Product provides, the quality of the Product, the level of customer service that is provided and any other features that the Product may offer.	The interest rates, fees and charges customers pay for the Product, comparable market rates, advice fees paid to intermediaries and non-financial costs associated with operating the Product.	The cost of funding the Product	Any limitations on the scope and service we provide or the features of the Product.

Results of our assessment

Our assessment concluded that the Product continues to deliver fair value for customers in the target market for the Product.
