

Another complex case solved

Who's the star of this story?

1

A high net-worth client with multiple assets, including a significant bitcoin portfolio.

What was the catch?

We do not usually accept bitcoin as income.

While the client was wealthy, much of his portfolio was tied up in cryptocurrency, making affordability less straightforward for traditional underwriting.

2

How did we make it work?

3

We considered the client's overall financial position and his strong track record with investments.

With underwriting support, we were able to monetise his bitcoin portfolio and factor this into affordability, getting comfortable with the lending despite the unconventional asset mix.

How did we seal the deal?

4

The case was approved, and the offer was issued within 3 weeks.
